SUMMARY

Passionate about leveraging technology for positive change, I'm a curious mind, always seeking knowledge and embracing challenges. I firmly believe that the responsible use of technology can drive significant and much-needed changes in the world. I actively volunteer with social and environmental NGOs, contributing my skills to meaningful causes close to my heart.

WORK EXPERIENCE

Lynxai

10/2022 - 02/2024

Software Engineer

Developed a data-driven platform that facilitates ESG analysis and ensures compliance with relevant standards and regulations. Responsibilities included:

- Authentication and security implementation;
- UI/UX design and UI kit creation and deployment;
- Data pipeline creation and AWS Lambda functions;
- CI/CD deployment and conducted A/B testing; Developed APIs with Node.js and Python for faster data processing.
- Managed AWS RDS (MySQL) and DynamoDB for scalable databases.

Technologies: Javascript; TypeScript; Python; GitHub CI/CD; Postman; AWS; REST API; Figma; Firebase; Storybook; React; ReactQuery; Redux; SQL.

InnoWave

10/2020 - 10/2022

Software Developer

Worked closely with a U.S. telecommunications client in an agile setting, using JIRA to manage projects and ensure timely software deliveries. Responsibilities included:

- Automating workflows and improving operational efficiency using the Appian low-code platform, earning certifications in Appian development.
- Developing APIs and microservices with Node.js to enhance system responsiveness and service integration.
- Implementing a microservices architecture on AWS, utilizing serverless functions like Lambda and API Gateway to improve scalability and reduce costs.
- Developing and maintaining .NET applications using the MVC framework within a serverless environment to ensure performance and reliability.

Technologies: Javascript; TypeScript; Node.js; .NET (MVC); Appian; AWS (Lambda, API Gateway); JIRA; REST API; Jenkins; Postman; Microservices.

Recycular

12/2019 - 06/2020

Mobile Developer

Developed a mobile and web application in partnership with a Portuguese recycling company to enhance circular economy practices in the recycling industry. Responsibilities included:

- Designing and implementing the business plan to align with industry needs.
- Developing and deploying the mobile and web applications.
- Ensuring seamless user experience and operational efficiency.

Technologies: React; React Native; Node.js; Firebase; AWS; PostgreSQL.

Freelancer Developer

01/2024 - 01/2025

Developed various websites and web applications for companies, focusing on performance, scalability, and user experience.

- Designed and built responsive UIs with modern frameworks.
- Developed and integrated backend services and APIs.
- Deployed and managed cloud hosting and databases.

Technologies: TypeScript, Next.js, Vercel, Firebase, Express, React, AWS (EC2, Lambda, Amplify, RDS, DynamoDB).

EDUCATION

Computer Science and Business Management

09/2016 - 06/2020

ISCTE - Instituto Universitário de Lisboa

Main subjects: OOP; Software Engineering; Operative Systems; Computer algorithms and modeling; Computer architecture.
Technologies: Java; Javascript; C; Eclipse; SQL studio; Power BI.

Erasmus+ in Computer Engineering

01/2019 - 07/2019

Tallinn University of Technology

Main Subjects: Matlab; Cybersecurity; Financial management; Software Engineering
Technologies: Python; Javascript

CERTIFICATES

AWS Certified Developer - Associate

09/2022

Practical Python Programming

01/2022

Certified Appian Developer

12/2020

VOLUNTEERING

Assistent Teacher - Associação Filhos do Céu, Brasil

02/2024 - 05/2024

Supporting children development through academic assistance, creative activities and programming lessons
